

# Plots Review

## Instructions

1. Open the unsolved [activity file \(Unsolved/plot\\_drills.ipynb\)](#), and look at each dataset starter code.
2. Determine what chart or plot best fits with the starter code of each dataset.
3. Complete the code block to create a plot for each of the datasets. Be sure to provide each plot with a title and labels.

## Hint

If you are unsure what type of data is contained in the starter code, print it out!
