Average Rainfall

Instructions

- Look at the raw data (Resources/avg_rain_state.csv) in your resources folder. This dataset contains the average rainfall per state in any given year.

- Using the starter file (Unsolved/avg_state_rain.ipynb), generate a plot that shows the average rainfall per state.

Hints

- Think critically about the different plots we discussed today. Ask yourself which type of plot summarizes the data most effectively.

- Be sure to add a title, axis labels, and any other aesthetic elements that may help make the visualization more effective.
